

Amuk Kumar

Full Stack Developer (MERN Stack | React.js | Node.js)

Hyderabad, Telangana | +91 8877347754 | skamuk159@gmail.com

linkedin.com/in/amukkumar | github.com/amukkumar | amukkumar.com

Professional Summary

Full Stack Developer with 2+ years of professional experience building consumer-facing web applications and backend services. Skilled in React.js, Node.js, NestJS, and TypeScript, with Express.js, MongoDB, and strong JavaScript, HTML, CSS, AJAX, and JSON fundamentals, plus hands-on experience in REST API development, performance optimization, security (JWT, RBAC), CI/CD, and AWS deployments. Delivered published, live applications with media playback and subscription payments, and worked across the full application lifecycle from design to deployment and support.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, AJAX, JSON, Java, Python, C++

Frontend: React.js, Redux, Next.js, React Native, Context API, jQuery, Tailwind CSS, MUI, Responsive Design

Backend: Node.js, Express.js, NestJS, REST APIs, WebSockets, JWT Authentication

Databases: MongoDB, MySQL, PostgreSQL, Redis, IndexedDB

Architecture: MERN Stack, Reusable Components, API Design, Microservices, Offline-First Systems, RBAC, Real-Time Systems, OOP

Cloud & DevOps: AWS, GCP, CI/CD, Docker, Jenkins

Testing & Tools: Jest, React Testing Library, Git, Postman, Swagger

Professional Experience

Software Engineer | Sune Solutions Pvt. Ltd.

Hyderabad, Telangana

May 2026 – Present

- Engineered scalable NestJS (Node.js) backend services and secure REST APIs (JSON) on MongoDB and MySQL, powering Papa Johns POS, a React Native POS, and a React Kitchen Display System.
- Cut redundant API calls and enabled near real-time data synchronization across POS terminals by implementing a Redis Pub/Sub event-driven architecture.
- Resolved multiple P1 production incidents in billing, order processing, and data synchronization, improving system reliability by diagnosing root causes across NestJS services and the database layer.
- Shipped new backend features and business workflows by collaborating with the React and React Native teams to define, build, and release each feature end to end.
- Streamlined deployments with repeatable releases and defined rollback strategies by automating project-specific CI/CD pipelines with Jenkins and AWS.

Full Stack Developer | Techmatic Systems Pvt. Ltd.

Hyderabad, Telangana

Apr 2025 – Apr 2026

Cloud POS | React.js, IndexedDB, Offline-First Architecture, REST APIs

- Delivered a complete React.js frontend from scratch covering POS, billing, and real-time transaction workflows, using reusable components, advanced state management, and optimized rendering for scale.
- Kept POS operations running without connectivity by engineering an offline-first architecture on IndexedDB with seamless bi-directional sync between offline and online environments.
- Ensured transactional consistency across distributed systems by building conflict-resolution logic.

Bottle POS | *React.js, Context API, Jest, PHP, MySQL*

- Resolved **200+** production issues across billing, inventory, and transaction modules, stabilizing the platform through end-to-end debugging and fixes.
- Improved UI responsiveness by **30%** by refactoring state management and optimizing rendering strategies.
- Achieved **100%** transaction accuracy by eliminating critical billing and state inconsistencies at their root cause.
- Enhanced real-time POS workflows by integrating **REST APIs** in collaboration with backend and product teams.

Fennec | *NestJS, PostgreSQL, Redis, Swagger, JWT, RBAC*

- Delivered **Node.js (NestJS)** Checklist and Inventory modules as fully documented **Swagger REST APIs**, with secure **JWT** authentication and **RBAC** for data protection.
- Reduced API response time by **40%** by optimizing database queries and indexing strategies.
- Improved authentication scalability and performance by integrating **Redis** caching and rate limiting.

Software Engineer | Intelli Edtech

Gurgaon, Haryana
Jun 2024 – Mar 2025

- Launched a scalable, consumer-facing EdTech web platform supporting AI-driven learning, content delivery, and real-time collaboration by architecting the frontend, backend, APIs, and authentication flows.
- Improved performance under high concurrent usage by optimizing **MongoDB** schema design, database integration, and indexing.
- Improved backend efficiency by **25%** by refining data modeling, adding caching strategies, and optimizing APIs.
- Introduced an AI-powered chatbot by integrating **Gemini Vertex AI** with advanced prompt engineering in a microservices architecture.
- Enabled interactive learning sessions with real-time features built on **WebSockets**.
- Accelerated releases by automating build, test, and deployment workflows in **AWS** and **GCP CI/CD** pipelines.

Selected Projects

Flipix Album | *React, Redux, PHP, MySQL, JWT, Framer Motion*

Live Project

- Engineered an interactive, consumer-facing digital album web app (published live) with advanced UI animations and media playback integration.
- Designed a scalable multi-role admin dashboard with granular access control and secure authentication.
- Integrated PhonePe payment gateway for subscription-based monetization.
- Developed RESTful APIs (JSON) and optimized media delivery for fast, responsive content rendering.

Selecto – Desktop Product | *Electron JS, PHP, MySQL*

Live Product

- Developed photo selection software reducing manual image culling time by **60%**.
- Integrated Razorpay payments and wallet-based recharge system, increasing user retention by **40%**.
- Optimized MySQL queries, improving system performance by **35%**.

GetMeMarry – Matrimony Platform | *ReactJS, React Native, Firebase, PHP, MySQL*

Play Store

- Built and published a full-stack, consumer-facing matrimonial platform (web and mobile) with advanced profile filtering and real-time messaging.
- Optimized search performance, reducing query latency by **40%**.
- Integrated CCAvenue subscription payments, increasing paid user conversion by **20%**.
- Implemented Firebase-based real-time chat across Android and iOS platforms.

Education

Master of Computer Applications (CGPA: 8.49)

2024

LNCT University

Bhopal, MP

Bachelor of Computer Applications (74%)

2022

TNB College

Bhagalpur, Bihar
